

HimeetingTM Video Conferencing System

Video Conference, Collaboration, Presentation, Training and more

No matter how the world changes, an efficient communication is always one of the keys for your success. With Himeeting - the software video conferencing system, organizations can communicate, collaborate, and train online with real time audio, video and interaction through standard web browsers. Himeeting is ideal for online video conference, web seminars, online customer service, staff training, sales meeting and more, which user can attend anytime, anywhere.

Himeeting Video Conferencing System enables you, your team, your customers, and partners to see and talk to each other through Internet. Not only are the audio and video communications, digital contents is also a very important part in an efficient communication or training. Himeeting incorporates all of the essential web conferencing features - digital whiteboard, presentations, application sharing, text chat, voting, and web video - in an attractive and easy-to-use interface.

To get the most out of your dispersed organization, you need real interaction. Himeeting is a comprehensive system for Web communications, delivered in a single, easy-to-use interface for access anytime and anywhere.

Himeeting helps you to do more business, meet more customers, train more partners better, faster and easier!

- Reduce your cost for conferencing and traveling without sacrificing the communication efficiency.
- Increase communication effectiveness with more frequent and rich-media online events.
- Conduct product demonstration, discuss proposals, and spread sheets as if in a face to face meeting.
- Deliver high quality multi video and multi-channel audio smoothly and instantly.
- Proprietary encryption techniques, priority setting and password protection to ensure meeting safety.
- Both participants and presenters can record the meeting respectively for future viewing and training.

Meet Your Team Online
